EDUCATION

K.J. Somaiya College of Engineering

Bachelor of Technology in Computer Engineering, Honours in Data Science and Analytics

9.41 CGPA

2023 – 2027

EXPERIENCE

Proxenix

June 2025 – July 2025

AI/ML Intern

Remote

- Built movie sentiment analysis and text summarization models using **transformer architectures**.
- Achieved **89% sentiment accuracy** and **65% text reduction** with strong context retention.
- Optimized model training and preprocessing pipelines, improving runtime efficiency by **30%**.

DFX

March 2026 – June 2026

AI Associate & Product Intern

Boston, MA, USA (Remote)

- Completed a 12-week internship focused on private capital markets, engineering pipelines with **DFXIntel** and **PollCap** to automate deal intelligence extraction.
- Collaborated with cross-functional teams across AI, product, and marketing to analyze platform features, validate **agentic workflows**, and identify opportunities for product growth.

PROJECTS

HookFlow | React, TypeScript, Express.js, WebSockets, Gemini — [Live](#)

- Architected a real-time webhook proxy with a **zero-tunnel browser relay**, delivering inbound webhooks to localhost in **<15ms average latency** without ngrok or third-party daemons.
- Implemented timing-safe **HMAC-SHA256 verification** for **Stripe**, **GitHub**, and **Shopify** with **1-click event replaying** and full header inspection to debug and reproduce webhook failures.
- Integrated **Gemini 2.5 Flash** to parse raw JSON payloads and auto-synthesize **TypeScript interfaces**, **Zod schemas**, and **Express verification middleware** directly in the browser.

Mockly | Next.js, TypeScript, MongoDB, Redis, Gemini, LLaMA — [Live](#)

- Built an AI-powered interview preparation platform with **3 assessment modes**: resume analysis, MCQ assessments, and mock interviews.
- Implemented **1-to-1 AI interview sessions** with STT/TTS support and a **9-dimensional evaluation system** for candidate feedback and performance analysis.
- Generated **10 role-specific interview questions** from resumes and job descriptions using Gemini, LLaMA models.

StakED | React, TypeScript, Express.js, MongoDB, Solidity — [Live](#)

- Built a decentralized student **staking platform** using **PayPal PYUSD**, enabling students to stake on academic outcomes with on-chain reward distribution.
- Developed **3 Solidity smart contracts** for exam management, student/verifier registries, staking, and proportional payout execution using **Hardhat**.
- Integrated **Blockscout analytics** for tracking stakes, rewards, and transactions.

TECHNICAL SKILLS

Languages: C/C++, TypeScript, JavaScript, Python, Java, Solidity, HTML/CSS

Frameworks/Libraries: React, Next.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, PyTorch, Pandas, NumPy

Databases: MongoDB, PostgreSQL, MySQL, Redis, SQL

AI/LLM Tools: Gemini, LLaMA, Groq API, Whisper, Ollama, Hugging Face

Developer Tools: Git/GitHub, Docker, Vercel, Vite, ShadCN UI, Postman, OpenAPI, Hardhat, Ethers.js

ACHIEVEMENTS

Winner at ETHGlobal Online 2025 — won track prize from over **1,600+ participants** and **600+ submissions**.
