EDUCATION

K.J. Somaiya College of Engineering

9.41 CGPA

Bachelor of Technology in Computer Engineering, Honours in Data Science and Analytics

2023–2027

Apeejay School Nerul

91.4%

Central Board of Secondary Education

2021–2023

EXPERIENCE

Proxenix

June 2025 – July 2025

AI/ML Intern

- Built movie sentiment analysis and text summarization models using transformer architectures.
- Achieved 89% sentiment accuracy and 65% text reduction with strong context retention.
- Optimized model training and preprocessing pipelines, improving runtime efficiency by 30%.

DFX – AI Associate & Marketing Intern

March 2026 – June 2026

Boston, Massachusetts, USA

- Completed a 12-week internship focused on private capital markets, gaining hands-on experience with DFX's AI ecosystem, including DFXIntel, PollCap, and internal deal intelligence platforms.
- Researched and evaluated AI tools, workflows, and infrastructure to understand their application in private market intelligence, automation, and data-driven decision making.
- Contributed to a non-AI moat strategy project by proposing the *Personal Live Network* concept—a self-reinforcing ecosystem where user interactions continuously generate live, proprietary relationship and deal-flow data within the platform.
- Worked closely with cross-functional teams across AI, product and marketing to analyze platform features, validate workflows, and identify opportunities for product and business growth.

PROJECTS

goBroke | *HTML, CSS, JavaScript, PHP, MySQL*

- Built a full-stack budget tracker to manage income, expenses, savings, and bill reminders.
- Developed PHP–MySQL backend with secure login and CRUD for financial data.
- Designed a responsive, user-friendly interface improving accessibility and usability across devices.

Mockly | *React, TypeScript, Express.js, MongoDB* | [Link](#)

- Built an AI-powered job application assistant that analyzes resumes against job descriptions using Google Gemini, generating compatibility scores, missing keywords, and tailored improvement suggestions.
- Developed a dynamic MCQ assessment engine that creates 10 job-specific questions, evaluates performance in real time, and produces detailed analytics across skills, topics, and speed.

Staked | *React, TypeScript, Express.js, MongoDB, Solidity* | [Link](#)

- Built a decentralized education-performance staking platform where students stake PayPal PYUSD on their own or peers predicted exam scores and earn rewards based on verified academic results.
- Designed an on-chain exam, verifier, and score-submission system using Solidity and Hardhat 3, with transparent analytics integrated into both student and verifier dashboards.
- Developed a full-stack application with 2 real-time dashboards, on-chain verification, and PYUSD-based incentive mechanics, creating a trustless academic rewards ecosystem.

TECHNICAL SKILLS

Languages: C/C++, TypeScript, JavaScript, Python, Java, Solidity, HTML/CSS

Frameworks & Libraries: React, Node.js, Express.js, Tailwind, Bootstrap, Ethers.js, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy

Databases: MongoDB, PostgreSQL, MySQL, SQL

Developer Tools: Git/GitHub, Vercel, Vite, ShadCN, Docker, OpenAPI, Postman, VS Code, Canva, Figma

ACHIEVEMENTS

Winner at **ETHGlobal Online 2025** — won track prize from over **1600+** participants and **600+** submissions.
