Education

K.J. Somaiya College of Engineering — Mumbai, India
B.Tech in Computer Engineering (Honours in Data Science & Analytics) – ***CGPA: 9.41*** — *2023 – 2027*

Apeejay School Nerul — Navi Mumbai, India
Central Board of Secondary Education (CBSE) – Class XII – ***91.4%*** — *2021 – 2023*

Experience

DFX — Boston, MA, USA (Remote)
AI Associate & Product Intern — *March 2026 – June 2026*

- Engineered private market intelligence pipelines using DFX's AI suite (DFXIntel, PollCap) to automate deal flow extraction.
- Architected the *Personal Live Network* moat, designing a graph model to generate live relationship intelligence from user data.
- Integrated LLM workflows and agentic tools into internal platforms, reducing data verification turnaround time by 35%.

Proxenix — Mumbai, India
AI/ML Intern — *June 2025 – July 2025*

- Built and fine-tuned Transformer models for multi-class sentiment analysis and abstractive text summarization.
- Achieved 89% sentiment classification accuracy and a 65% text reduction ratio with strong context retention.
- Optimized PyTorch preprocessing pipelines, improving training throughput and model runtime efficiency by 30%.

Projects

Mockly | *React, TypeScript, Express.js, MongoDB, Gemini API* | GitHub | Live

- Built an AI job assistant that parses resumes against job descriptions via Gemini, outputting match scores and keyword gaps.
- Developed a dynamic MCQ engine generating 10 tailored technical questions with real-time speed and accuracy analytics.

StakED | *React, TypeScript, Express.js, Solidity, Hardhat, PYUSD* | GitHub | Live

- Built an education staking platform where students stake PayPal PYUSD on predicted exam scores for verified rewards.
- Authored gas-optimized Solidity smart contracts with on-chain score verification and real-time student/verifier dashboards.

goBroke | *JavaScript, PHP, MySQL, CSS3, HTML5* | GitHub

- Developed a full-stack personal finance tracker to manage income, expenditures, savings goals, and bill notifications.
- Designed normalized MySQL database schemas and secure PHP backend endpoints with session authentication and CRUD ops.

Technical Skills

Languages: Python, TypeScript, JavaScript, C/C++, Java, Solidity, SQL, HTML/CSS
AI & Machine Learning: PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LLMs, NLP, Prompt Engineering
Web & Frameworks: React.js, Next.js, Node.js, Express.js, RESTful APIs, Tailwind CSS, Bootstrap, Ethers.js
Databases & Developer Tools: MongoDB, PostgreSQL, MySQL, Docker, Git, GitHub Actions, Vercel, Postman, Hardhat

Achievements

Winner at ETHGlobal Online (2025): Awarded top track prize among **1,600+** global participants and **600+** project submissions.
